## SIZING GUIDE FOR RINGS

### PRINTING SETTINGS

To get the best results, you should go to “print” and choose “actual size” in the “size option” before printing. The Georg Jensen Ring Size Chart must be printed on an A4 size page. To check that the Ring Size Chart has been printed properly, take a ruler and measure the sample below. It should measure exactly 2 cm.

### HOW TO USE THE GEORG JENSEN RING SIZE CHART

- If you have a ring that fits perfectly on the finger on which the Georg Jensen ring will be worn, you can match it on the Ring Size Chart to find the closest fitting circle.
- If you fall in between two sizes, we recommend that you choose the larger size. Note that the ring size can vary depending on design and fit on the finger.

The inner edge of the ring is **NOT** aligned with the outer edge of the circle;

**RING SIZER**  
  
CHOOSE A  
SMALLER SIZE

The inner edge of the ring is **NOT** aligned with the outer edge of the circle;

**RING SIZER**  
  
CHOOSE A  
LARGER SIZE

The inner edge of the ring **IS** aligned with the outer edge of the circle;

## WIDE RINGS

A wide ring will require a larger ring size - and multiple rings worn next to each other on the same finger, may require the same.

## FUSION RINGS

The Fusion ring is a wide ring, when putting 2,3 or 4 parts together. When having a wide ring, you would often need to go 1-2 sizes up compared to what you normally use. The Fusion ring sizing takes this into account, so if you usually use a size 52, you would also use a 52 in Fusion.
